WELCOME TO GOOD & GREEN

Good & Green Manufacturing Corp.
is a state-of-the-art cannabis processing,
manufacturing, packaging, and distribution hub
for the Canadian cannabis industry.

Powered by the industry leading team at 48North,
a vertically integrated Licensed Producer,
Good & Green Manufacturing Corp. is a one-stop
shop for all your cannabis manufacturing needs.

In operation since 2017, Good & Green
Manufacturing Corp. has successfully launched
over 50 products – ranging from vapes, pre-rolls,
hash, flower, solventless extracts, and topicals –
in the recreational marketplace. This track-record
of getting finished product to market is
Good & Green's most notable differentiator.

EXPERTISE AND SERVICES

Good & Green will service all of your cannabis needs. We are able to turn your cannabis idea into reality, with a proven record of getting high-quality product to market with efficiency at scale, we are your one-stop shop for all contract manufacturing and White label needs.

Contract
Manufacturing

Manufacturing of product across a number of product forms, including: flower, pre-rolls, and vapes.

Raw Material
Sourcing

Without a cultivation license, sourcing cannabis can be challenging. Good & Green has access to its own cultivation facilities (delshen, Good:Farm) and strong relationships with cannabis cultivators right across the country.

Packaging
and Design

We work with our partners to ensure that your packaging and design are compatible with our systems, and compliant under the Canadian Cannabis Act.

Sales and
Distribution

In a highly regulated landscape, only certain producers have the ability to sell into certain markets across the country. As the industry expands, the ability to form relationships with provincial wholesalers, becomes increasingly challenging. Importantly, to distribute into the provinces one requires a sales license from Health Canada - a process that can take upwards of two years. To that end, Good & Green has strong relationships with all of the provincial wholesalers across the country and all appropriate licenses and therefore has the ability to launch your product nationwide - tomorrow.

Regulatory
and Quality
Assurance

In addition to product development, compliant packaging and product design, Good & Green offers all the regulatory and quality assurance capabilities to ensure that the products that you launch into the marketplace meet the strict regulatory requirements for success.

OUR FACILITY

Good & Green Manufacturing Corp. operates out of 48North’s manufacturing facility Good:House in Brantford, Ontario, located 80 minutes from downtown Toronto. Good:House is a 46,000 sq. ft. state-of-the-art indoor processing facility that serves as the processing, manufacturing, packaging, and distribution hub for 48North branded products. At Good:House, Good & Green Manufacturing Corp. has the capacity to manufacture and package baggable flower, pre-rolls, and vaporizers.

DID YOU KNOW

Did you know? 30,000 kg of extraction capacity enables the company to supply the market with 5 million concentrate vaporizers, among other products, annually.

Inside the Good:House, you will find Fume Labs. Fume Labs is the manufacturing platform for developing high quality and authentic cannabis concentrates and experiences through industry leading formulation expertise.

BIOMASS & PRODUCT SOURCING

ONE

Supplied by Good & Green

Not only does Good & Green grow high-quality product at Good:Farm, it also leverages organic growing methods and is transforming into Canada’s first regenerative cannabis farm. Good quality product, that is good for the enviroment too.

We offer a range of biomass sourcing options for clients. We will work with you to find the best option for your needs.

TWO

Procured by Good & Green

Good & Green has relationships across the cannabis industry. We are able to procure cannabis for all of your cannabis needs. Whether you are looking to launch a discount brand or a premier quality flower brand we will find the cannabis you need at industry-leading prices.

THREE

Supplied by Client

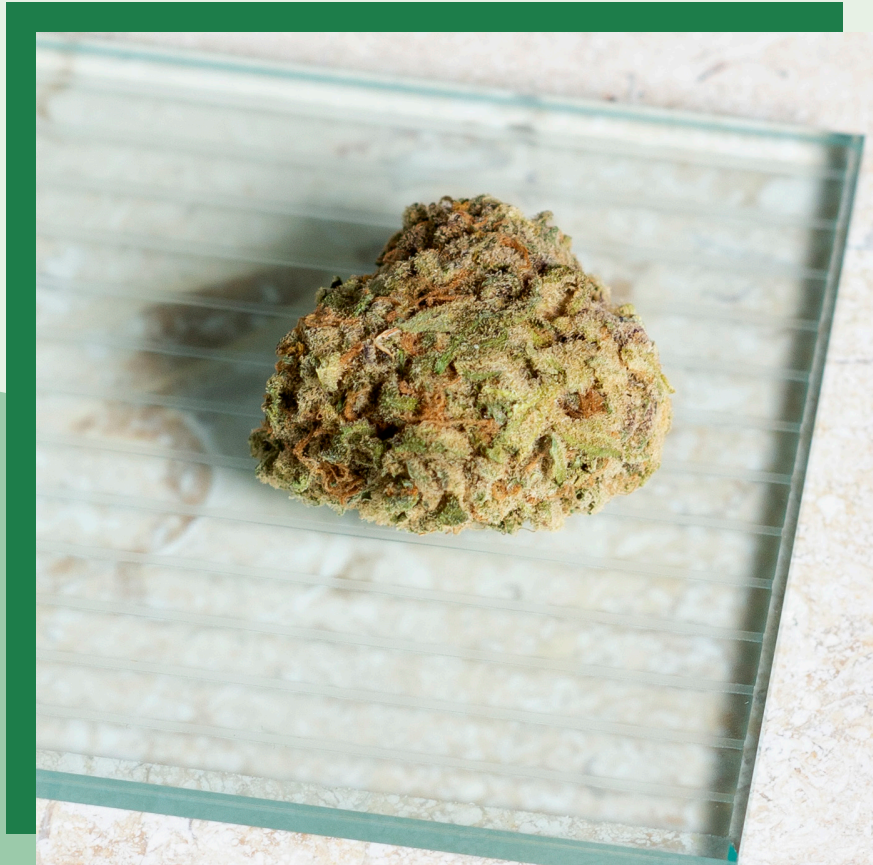

B.Y.O.B – bring your own biomass.

WHOLE DRIED FLOWER

Dried flower is what got us here in the first place, it still represents the greatest proportion of the market in Canada. From strain variety, to cultivation method, to price point, Good & Green can service all of your dried flower needs.

Formats

3.5 – 28g

PRE-ROLLS

Pre-rolls can come in a range of sizes and formats but are made up of whole dried flower ground and rolled into a convenient ready-to-use format.

Formats

SINGLE PRE-ROLL OPTIONS
From 0.35g – 1.0g

MULTI-PACK OPTIONS
From 2-10

VAPORIZERS: FULL SPECTRUM WINTERIZED OIL

Full Spectrum winterized oil is extracted using a method called Super Critical CO₂ extraction to produce a true to flower high quality oil. It retains all the natural cannabinoid, terpene and flavonoid profiles in the oil. Fume Labs uses a proprietary method to extract the native strain terpenes, retaining their quality and flavour. Full Spectrum oil is the closest to consuming whole flower as a vaporizer product can get.

Formats

510 Thread Cartridge

All-in-one pens

VAPORIZERS: DISTILLATE WITH NATIVE TERPENES

Cannabis distillate from Good & Green, is Super Critical CO₂ extracted cannabis oil that is then distilled to get a more concentrated THC oil suitable for vaporizer consumption.

Fume Labs uses a proprietary method to extract the native strain terpenes from the original flower inputs, and reintroduces them into the final product resulting in a clean, quality product.

Formats

510 Thread Cartridge

All-in-one pens

VAPORIZERS: DISTILLATE WITH BOTANICAL TERPENES

Cannabis distillate from Good & Green, is Super Critical CO₂ extracted cannabis oil that is then distilled to get a more concentrated THC oil suitable for vaporizer consumption. Terpenes are sourced from botanical sources, and not from the cannabis plant.

This creates a consistent product from batch to batch and due to the less time-consuming process, results in a highly consistent but more affordable product for the producer and the consumer.

Formats

510 Thread Cartridge

All-in-one pens

Good & Green is your one-stop shop
for any cannabis manufacturing
needs. With expertise ranging from
cultivation to distribution and sales, if
you are looking to launch high-quality
cannabis products, in a timely way –
Good & Green is the partner for you.
